<sup>1</sup> Eligible population includes all inmates identified as eligible for institution program assignments. Inmates excluded from institution program assignments may include inmates housed in Outpatient Housing Units, Correctional Treatment Centers, Hospitals, Mental Health Crisis Beds, Administrative Segregation Units, and other housing areas where education services are not provided or inmate movement is restricted. This number is derived from the institution Daily Movement Sheet (DMS).

<sup>2</sup> It is important to note that the target population, ie. based on risk, need, and time left to serve is more narrow than the definition of eligible population. Therefore, the percent of the target population actually served under the proposed model will be higher.

<sup>3</sup> Capacity does not include 500 individuals enrolled in the mandated Developmentally Disabled and Disability Placement Programs, which was not available by gender at the time this document was prepared. No changes are being made to either of these program.
